

Trusted, Proven Products for Apples and Pears

Arysta LifeScience offers an expanded portfolio of innovative and trusted crop protection products for the pome fruit market — products that protect your apples and pears from weeds, insects and disease for improved fruit quality and yield.

Acramite^{*}

MITICIDE

ACRAMITE® provides good knockdown and long-lasting residual control of pest mites and is especially effective during the motile stage. ACRAMITE is also easy on predatory mites and beneficial insects. The unique mode of action makes it an excellent choice for a resistance management program.

Casoron

HERBICIDE

CASORON® is an easy-to-use granular herbicide that provides long-lasting, effective control on a broad spectrum of annual grasses, broadleaf weeds and certain perennial weeds.

Kanemite

MITICIDE

KANEMITE® provides excellent control of two-spotted and European red mite with a single rate of application. It is active on all life stages, providing quick knockdown of nymphs and adults while being easy on predatory mites and beneficial insects.

Kasumin

BACTERICIDE

KASUMIN® is a novel bactericide. The active ingredient, kasugamycin, has a unique mode of action, making it effective against Fire blight as well as streptomycin-resistant strains of bacteria in apples and pears.

Maestro

FUNGICIDE

MAESTRO® provides dependable, broad-spectrum disease control in apples and pears with minimal impact on beneficial insects, making it a good fit for IPM programs. MAESTRO features multiple modes of action, which reduces the potential for disease resistance.

Rimon^{*}

INSECTICIDE

RIMON® controls codling moth and Oriental fruit moth in apples. The unique mode of action also makes it an excellent choice for a resistance management program.

* Not registered for use on pears.
