PRODUCT DATA SHEET

Apple Lustr[®] 225 Morpholine Free, Shellac Based Coating

DESCRIPTION

Apple Lustr 225 is a morpholine-free alcohol containing quick-drying high shine shellac wax for use on fresh apples. The coating reduces weight loss due to dehydration and serves as a compatible carrier for most fungicides.

DIRECTIONS FOR USE

This product is for post harvest application to freshly washed apples. Apply by spraying onto the apples on a brush bed or other suitable applicator. Apply Apple Lustr 225 without dilution at the rate of one gallon to 10,000 (1 liter per 1,000 K) pounds of apples. Higher usage can be obtained on certain cultivars such as McIntosh, Golden Delicious, and Granny Smith. For best results, clean fruit with an appropriate Decco Cleaner before applying this coating.

CAUTION!! Condensation may form on apples following their removal from cold storage or for other reasons related to the manner in which they are stored, handled, processed or packed. Subsequent evaporation of the moisture may cause white spotting of the fruit coating. Because condensation with resultant white spotting can be caused by many variable conditions, all of which are beyond the control of Decco, we assume no responsibility for white spotting following the use of this wax.

PRECAUTIONS See product label for additional precautions and recommended first aid.

COMPOSITION

Apple Lustr 225 contains FDA approved food grade ingredients listed in CFR 21 for coatings on apples. It contains water, natural resins, fatty acid soaps, ammonia, silicone antifoam, selected fast-drying solvents and propyl paraben as a wax preservative.

PHYSICAL PROPERTIES

Appearance: A light amber liquid
pH range: 9 ± 0.2
Viscosity: 12 ± 3 cps
Percent solids: 18 ± 0.5
Specific gravity: 1.009 g/cc, 8.424 lbs/gal
Flash point: $>85^{\circ}\text{F}$

STORAGE CONDITIONS

Store this product in a cool, dry place. Keep away from heat, sparks, and open flames. Avoid storage below freezing temperatures. If frozen, thaw completely prior to use.
