

A Portfolio of Proven Products for Grapes

Arysta LifeScience offers an expanded portfolio of innovative and trusted crop protection products for grapes — products that will protect your grape crop from weeds, insects and disease for improved fruit quality and yield.

Acramite MITICIDE

ACRAMITE® provides good knockdown and long-lasting residual control of pest mites and is especially effective during the motile stage. ACRAMITE is also easy on predatory mites and beneficial insects. The unique mode of action makes it an excellent choice for a resistance management program.

Casoron HERBICIDE

CASORON® is an easy-to-use granular herbicide that provides long-lasting, effective control on a broad spectrum of annual grasses, broadleaf weeds and certain perennial weeds.

Elevate FUNGICIDE

The unique active ingredient in ELEVATE® provides outstanding control of *Botrytis cinerea* (Bunch rot). ELEVATE has no impact on grape ripening, fermentation or flavour.

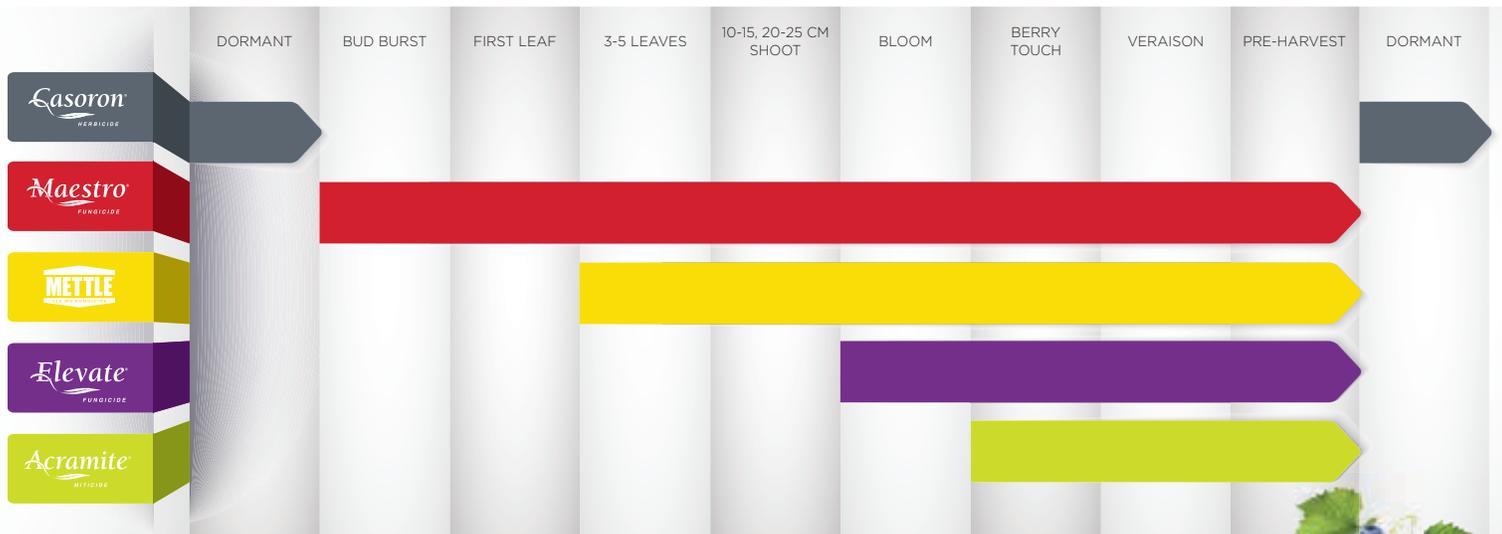

Maestro FUNGICIDE

MAESTRO® provides control of Downy mildew, and Phomopsis cane and leaf spot in grapes with minimal impact on the environment. MAESTRO features multiple modes of action, which reduces the potential for disease resistance.

METTLE SEE US FOR FUNGICIDES

METTLE®, with strong preventative activity, controls Powdery mildew for improved fruit quality and yield with no adverse crop effect. A highly systemic active ingredient, combined with state-of-the-art formulation, provides long-lasting protection and superior disease control.
