Net Contents: 10 L

**ADHERE** is a deposition utility modifier that improves the deposition of pesticides onto plant and soil surfaces.

**ADHERE** should be used in accordance with good agronomic practices, which include using calibrated spray equipment set for proper coverage. Applications must be made during the day at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

#### DIRECTIONS FOR USE

**ADHERE** is compatible with products registered for agricultural uses. **ADHERE** may be applied by ground or aerial spray equipment in low or high water volume sprays.

Application Method	Rate (mL/ha)*
Foliar applications by ground	360 - 720
Aerial application	360 - 720
Soil Applied	560 - 1120

\*Use higher rates as season and plant growth progresses.

Regardless of application method, always use enough water to obtain adequate spray coverage.

**MIXING:** Fill spray tank one-half full with water and begin agitation. Add pesticides as directed by label and continue filling. Add **ADHERE** last and continue agitation.

**PHYTOTOXICITY PRECAUTION:** Under some environmental conditions, some pesticides or pesticide combinations may cause phytotoxicity on growing plants. Use this product in a manner consistent with individual pesticide product recommendations.

**ENVIRONMENTAL RESTRICTIONS:** This product is not for aquatic use. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

**STORAGE AND DISPOSAL:** Do not contaminate water, food, or feed by storage or disposal.

For more information on specific applications please contact your Engage Agro Representative.
